Let the sun pay your electric bill !

Sunkit S

Solar power is a clean, reliable and cost effective energy solution

When sunlight falls on solar panels, it generates electricity. There are no moving parts to maintain or wear out. In fact, many of our PV modules are still operating well past their 25 year warranty period. Once installed, you can expect clean energy production for decades.

Homeowner advantages

Benefit now

- Take advantage of a \$2,000 federal income tax credit for installations completed by Dec. 31st, 2008.
- California state rebates can offset 25% or more of the installed cost.

Benefit for years to come

- A Sunkit can boost the resale value of your home by up to 20 times the annual energy savings from the system. This means an added bonus to differentiate your home even during a soft real estate market.
- As electric rates rise, you'll be saving even more money.
- Getting your power from sunlight means you can avoid the pollution and greenhouse gas emissions associated with generating that electricity with fossil fuels

Solar power solutions from SolarWorld California, an industry leader

- SolarWorld Sunmodules[®] are 100% made in the USA by the largest and most experienced solar manufacturer in America. This means rock-solid reliability backed by a 25 year power guarantee.
