

Put more money in your pocket

- Increase the resale value of your home, or office building
- Lower your electricity bill by up to 70%
- Protect the environment by using solar energy

Sunmodule®

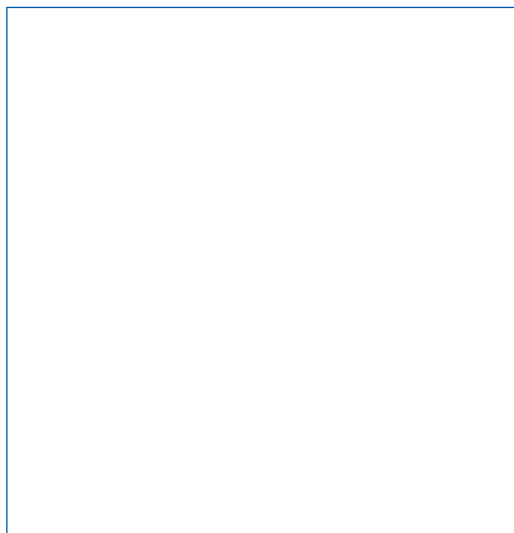

- Industry-leading performance for 30 years
- Designed to last more than 25 years
- Recent independent test show that SolarWorld Sunmodules outperform the competition
- More kWh for your money
- Module power warranty for 25 years from the largest solar products manufacturer in America since 1977

Electricity costs continue to rise—on average between four to seven percent annually

Without Sunmodules on your roof, your electricity costs could double in 10 years or sooner...

Call your local SolarWorld partner today for a free consultation and financial analysis:

Let the sun pay your electric bill!

SolarWorld is the largest solar PV manufacturer in America since 1977

You can count on American-made SolarWorld Sunmodules for superior energy production and rock-solid reliability. Sunmodules are backed by our 25 year power warranty and we've been confidently standing behind our products for over 30 years.

Sunmodule®

Homeowner advantages

Benefit now

- Take advantage of a \$2,000 federal income tax credit for installations completed by Dec. 31st, 2008.
- State rebates can offset up to 25% or more of the installed cost.

Benefit for years to come

- Putting SolarWorld Sunmodules on your roof can boost the resale value of your home by up to 20 times the annual energy savings from the system. This means an added bonus to differentiate your home even during a soft real estate market.
- As electric rates rise, you'll be saving even more money.
- Getting your power from sunlight means you can avoid the pollution and greenhouse gas emissions associated with generating that electricity with fossil fuels.

Solar power is a clean, reliable and cost effective energy solution

When sunlight falls on solar panels, it generates electricity. There are no moving parts to maintain or wear out. In fact, many of our PV modules are still operating well past their 25 year warranty period. Once installed, you can expect clean energy production for decades.

This little piggy went solar
... and laughed all the way to the bank.
