William,

Please see the attached corrections for this project.

- 1 provide permit number for generator or include in this permit by providing cut sheets, site plan, and gas schematic/design etc.
- 2 Remove the feed from the gen panel to the inverter panel
- 3 Remove the feed from the inverter panel to the utility panel
- 4 Indicate the required grounding at each structure on the single line diagram.

(See attached file: 12 W - Photovoltaic plans TOM NIX.pdf)
